MOTOROLA TALKABOUT® MR355R TWO-WAY RADIO SERIES

Sporting the REALTREE® AP HD® CAMO pattern, the Motorola Talkabout® MR355R is the ultimate communication tool for the serious outdoor enthusiast. Loaded with every possible radio feature, you know that you are ready for the extreme outdoors. Lightweight and rugged, with extra large buttons to help you operate even with gloves on.

TOTAL EMERGENCY PREPAREDNESS

The MR355R includes an emergency alert feature, allowing you to enjoy your escape to the great outdoors with confidence that others can be informed of any dangers that may come your way. When the alert button is activated, the radio transmits an alert siren followed by transmission of spoken or incidental sounds. This allows you to send the signal to other radios and warn of impending danger. The MR355R also features a built-in LED flashlight for peace-of-mind during evening adventures or unexpected emergencies and power outages.

REPEATER FUNCTION - IMPROVES YOUR COVERAGE BEYOND THE HORIZON

Maximize your camping, sporting or hunting experience by **improving your radio transmission coverage when talking to family or group members who sometimes wander far beyond the line of sight. Thanks to the built-in repeater channels, the MR355 works well with a local repeater station to carry your signal further. Take advantage of this value-added feature by switching to GMRS channels 15R-22R, but don't forget you'll need a ***GMRS license and an accessible repeater station to take advantage of this unique feature.

EXTRA POWER WHEN YOU NEED IT MOST

Push-To-Talk Power Boost, when activated, allows you to extend the transmission range by increasing the transmitter power output while saving battery life when no power boost is necessary.

EARBUD WITH PUSH-TO-TALK MICROPHONE - UNRESTRICTED COMMUNICATION

Exploring the wild or simply enjoying your outdoor passion? Use your earbuds as a convenient clutter-free way to speak and listen to other two-way radio users. Designed to comfortably fit in your ear, just plug the earbud connector into your MR355 radio and snap it to your lapel or shirt. Experience an unrestricted and discreet way to communicate when the pleasure of nature captivates you.

EASY CHARGE - 4 WAYS TO CHARGE

Designed to fit every lifestyle, the MR355R allows you the convenience of charging four distinct ways. Use the provided desktop charger at home or a mini-USB car cable on your way to soccer practice. Pack a mini-USB wall cable for recharge in the hotel during your family vacation or simply charge from your PC when no power outlet is available using a mini-USB PC cable. (Mini-USB car, wall and PC cables are sold separately.)

ANIMAL TONES - BLEND INTO THE WILD

Add stealth and fun to your outdoor adventure by masking your radio's normal ring tone under the guise of a quacking duck, a cackling goose, a gobbling turkey, a bugling elk or a howling coyote. You will find this a helpful way to blend into the untamed habitat of the wild.

SILENT SIGNALS

The VibraCall™ silent vibrating ringer is especially useful for locations where ringing can be intrusive. This feature is also great when noise from a sporting event would drown out your ring tone.

PRICING

MSRP for MR355R is \$89.99 per pair.(NiMH)

FOR ADDITIONAL MEDIA INFORMATION, CONTACT: COLLEEN PHILBRICK, CPHILBRICK@BELLSOUTH.NET OR SAM LUEDER, S.LUEDER@HAUSERGROUP.COM AT HAUSER GROUP, OR CALL (912) 604-1950. FOR DEALER OR CONSUMER INQUIRIES, PLEASE CALL 1-800-638-5048.

*How far can I expect my radios to communicate? The communication range quoted is calculated under optimum conditions, with an unobstructed line of sight. Actual range will vary depending on terrain and conditions, and is often less than the maximum possible. Your actual range will be limited by several factors including, but not limited to, terrain, weather conditions, electromagnetic interference and obstructions.
 **Extended range depends on the location, height and availability of the local repeater satellite station.
 ***The FCC requires that all operators using GMRS frequencies obtain a radio license before operating their equipment. To obtain the FCC forms, please call 1-800-418-3676 to request Forms 605 and 159, which includes all of the forms and instructions you will need. It is the responsibility of the radio user to read and understand all applicable rules and regulations regarding GMRS.
